

CODEMASTER DIGITAL DOOR LOCK

The **ERA Codemaster** has been enhanced with a new anti picking system, reinforced backplate, a metal latchbolt and improved fixing posts.

ERA Codemaster is a fully mechanical push button lock, suitable for regulating access in a variety of commercial, industrial and domestic applications. No keys or wiring required.

The lock is unlocked from the outside only through correct input of the user code and from the inside using an easy turn handle. Codemaster locks automatically on the spring latch bolt when the door is closed.

The security code can be reset in seconds using just a screwdriver, whilst the lock is fixed to the door. For added security, Codemaster has a 'primary key' feature - the first button pressed must be the primary key.

Codemaster is available in a range of colours and finishes.

Rebate sets and door repair plates are available.

DIGITAL DOOR LOCKS

The **ERA Digital Door Lock** is designed for easy access control, suitable for a range of applications. The lock can be unlocked from the outside through correct input of the user code. The code can be easily changed. Keyed options are available.

The Digital Door Lock automatically locks on the spring latch bolt. For added security, it has a vandal proof outer knob. On the inside the integral handle allows simple opening. The Digital Door Lock has a keyless operation - no keys to lose. The lock has over 5,500 code combinations, and can easily be set for right hand or left hand fitting.

It has the following features:

- Easy to operate and program using the keypad.
- Suitable for internal and external applications.
- Passage function so the door can be opened using just the handle when restricted access is not required.
- Suitable for door thickness 35-50mm.
- Maximum 9 digit code, minimum 1 digit.
- Deadlocking latch bolt.

ACCESS CONTROL LOCK

ERA electronic multi-point lock

ERA's new electronic multi-point lock linked to varying types of access control units, offers straight forward, affordable and convenient options that will enhance security for an extensive range of domestic, community and commercial properties.

Many electronic keeps commonly used with access control units do not provide a high level of security. However, the new electronic multi-point lock offered by ERA complies to the relevant security standards PAS23/24 and is Secured by Design for use in composite doors, so high security is guaranteed.

The ERA lock is available for front doors or main entry/exit doors. As no lever is required on the outside of the door this means that when the door is closed dead bolts automatically fire into the door frame keeps, leaving the door in a locked position. This removes the need to lift handles and turn keys.

The door can be opened by simple use of the lever handle on the inside of the door or by one of the three standard electronic trigger options offered by ERA. Additionally, a conventional key can be used to dead lock the door for added security and total peace of mind.

However, for more complex requirements the ERA security lock can be incorporated into any conventional Access Control system.
